

IDEAL

LOTION HAND CLEANER

DESCRIPTION

Made from the mildest, synthetic detergents, this lotion/hand cleaner makes the need for soap-type hand cleaners obsolete. Pleasantly perfumed, it quickly **removes dirt** and **grease** and leaves the skin soft. While soap-types always have a pH of 10.0 or greater, this product maintains a **pH of 7.0**; therefore, it is much **more compatible** with the natural **pH of the skin**. It is **particularly suited for the removal of industrial irritants** such as chemicals, solvents, oils, greases, and salts. Therefore, it is great for use in factories, hospitals, nursing homes, and offices. Furthermore, its high concentration goes a long way (economical)!

BENEFITS - FEATURES

- * Dispenser-ready
- * Cleans tough soils
- * Rich suds
- * Cleanses skin
- * Highly concentrated
- * Unique emollient system
- * Pleasant fragrance
- * Will not clog or drip
