ICE-O-THERM

GRANULAR SNOW AND ICE MELTER

DESCRIPTION

This product is the most effective and fastest ice melter known. In order for any de-icer to work, it must turn into solution. It's this solution that provides the de-icing action, not the solid material. By naturally attracting moisture from the atmosphere, ICE-O-THERM quickly turns into a solution. Most other ice melters must directly contact moisture which is not readily available at freezing temperatures. As this product dissolves, it gives off heat that speeds the de-icing process. Most other products need heat to dissolve. When it comes to ICE-O-THERM's de-icing speed, there is no contest. Furthermore, it works effectively at -25°F, whereas rock salt, potassium, chloride, urea and their blends are not very effective below +25°F.

BENEFITS - FEATURES

- * Melts ice instantly
- * Exothermic action
- * Melts more ice faster
- * Works effectively to -25°F
- - * Safer to concrete, grass, and plants
 - * Does not leave a white, powdery residue
- * Does not contain rock salt or potassium

ADVANTAGES

- * Long-lasting, de-icing action prevents refreezing
- * Won't damage floor finishes or carpeting
- * Poses the least threat of damage to concrete
- * Poses no greater risk to grass or plants
- * Fortified with corrosion inhibitor

WHERE TO USE

- * Wheelchair Ramps
- * Walkways
- * Driveways
- * Emergency Areas
- * Truck Ramps
- * Stairs
- * Parking Areas
- * Entrance Ways

RECOMMENDED FOR

- * Schools
- * Churches
- * Hospitals
- * Health Care Facilities
- * Shopping Malls
- * Recreation Facilities
- * Warehouses

- * Day Care Centers
- * Restaurants
- * Service Centers
- * Bowling Centers
- * Industrial Plants
- * Apartment Complexes
- * Office Buildings
- * Anywhere People and Rolling Equipment Need Safe Access

DIRECTIONS

Ice-O-Therm comes ready for instant use. Simply, spread it lightly and evenly over the area. Use hand scoop, spreader, or shovel. Ice-O-Therm can also be mixed with sand, rock salt, or similar materials.

SPECIFICATIONS

Melting point......Approx. 446°F Boiling point......338°F Vap. press.....0.009 mmHg @ 20°C Solubility in water.....Very soluble Specific gravity......2.2 Appearance......White to off-white; solid pellets

Flash point.....None Odor.....Odorless
