

CARBON-CLEAN

CARBON BUILD-UP REMOVER

DESCRIPTION

CARBON-CLEAN is formulated to break down and remove the baked-on carbon residue that is a stubborn problem for anyone who prepares meals in large capacity kitchens. Removing these heavy soils can be messy, difficult and even toxic.

CARBON-CLEAN is a revolutionary formula that easily removes carbon build-up, allowing you to renew the look and performance of your pots and pans that should otherwise be replaced.

Appearance matters to your guests, your employees and to anyone who enters your facility. Carbon staining on your pots and pans leaves a bad impression.

BENEFITS - FEATURES

- * Extends Life of Metalware
- * Aluminum Safe
- * No Scrubbing
- * Safe on most Metals

ADVANTAGES

- * Thickened formula to allow maximum contact time.
- * Removes baked-on carbon without scrubbing
- * Safe on Aluminum, Stainless Steel, Cast Iron and Copper.

WHERE TO USE

- * Baking Pans
- * Aluminum
- * Cast Iron
- * Storage Racks
- * Frying Pans
- * Stainless Steel
- * Copper
- * Stove Tops

RECOMMENDED FOR

- * Schools
- * Hospitals
- * Nursing Homes
- * Cafeterias
- * Institutions
- * Hotels
- * Restaurants
- * Country Clubs

DIRECTIONS

Easy to Use: CARBON-CLEAN is a thickened formula to allow maximum contact time. Simply pour onto the surface, spread on for full coverage, and allow product to penetrate 15 minutes for light duty and overnight for heavy duty cleaning.

Reapply as needed to prevent product from drying on surface. The carbon will peel or rinse right off.

SPECIFICATIONS

Biodegradability.....Complete
 Shelf life.....1 year minimum
 Rinsability.....Excellent

Color.....Yellow
 Flash point.....Not determined
