

COIL-BRITE

NON-ACID COIL CLEANER & BRIGHTENER

DESCRIPTION

This unique, new formula is a **powerful reconditioner designed to be used on condenser coils**, where in the past, harsh acid products were used, now **COIL-BRITE** can be used effectively instead. **COIL-BRITE'S amazing penetrating action provides outstanding cleaning power**; yet, it **does not contain acid**, making it safer to use. However, **COIL-BRITE** still quickly removes corrosion, oxidation, encrustation, grease, and grime (which are commonly found on aluminum); therefore, **allowing coils to operate at their peak cooling performance**. Furthermore, after rinsing, **COIL-BRITE leaves a clean, bright surface that is free of energy robbing coil encrustations**. To maximize the efficiency level of the air conditioner, routine maintenance is suggested. This will save on expensive downtime and replacement cost.

BENEFITS - FEATURES

- * Easy-to-use
- * No agitation or scrubbing required
- * Spray on; flush off
- * Restores cooling efficiency
- * Removes even the heaviest deposits
- * Cleans and brightens coils quickly
- * Restores condenser to peak efficiency
- * Biodegradable

ADVANTAGES

- * Quickly cuts through oxidation and grime
- * Leaves a clean, bright surface
- * Maximizes the efficiency level

WHERE TO USE

- * Wall Units
- * Refrigeration Chiller
- * Remote Cooling Units (in Ceiling or Walls)
- * Window Units
- * Refrigeration Trucks

RECOMMENDED FOR

- * Apartment Complexes
- * Hotels & Motels
- * Schools
- * Health Care Facilities
- * Food Processing Plants
- * Food Services
- * Municipalities
- * Office Buildings
- * Trucking Companies
- * Manufacturing Plants
- * Bus Companies
- * Shopping Malls

DIRECTIONS

- COIL-BRITE** must be diluted at least 1:1 for severe conditions. Or, it may be diluted by using one part **COIL-BRITE** with up to 5 or 10 parts water depending on the severity of the cleaning situation.
- Turn off fan in condenser unit and hose down condenser to cool fins.
- Starting at the bottom of the condenser unit and working up, thoroughly wet all portions of the fins with product.
- Allow 5 - 10 minutes for the penetration of surface films and built-up grime.

5. Flush off the entire condenser unit making sure all portions are thoroughly rinsed.

6. Allow unit to dry and examine surfaces for any remaining corrosion. Repeat application if necessary.

Air conditioning coils and fins should ideally be treated with COIL-BRITE in spring and fall. Several other applications can be made during the year as a regular preventive maintenance procedure in areas where contamination is severe.

Authorized by USDA for use in federally inspected meat and poultry plants. **Classification A-4.**

SPECIFICATIONS

Fragrance.....Mint	pH.....12.5 to 13.5	Flash point.....None
Color.....Bright Orange	Shelf life.....1 yr. min.	Biodegradable.....yes
Rinsability.....Very good
