DIRECTIONS

Cover exposed food, dishes and food-handling equipment. Open cabinets and doors to area to be treated. Shut off fans and air conditioners. Put out all flames and pilot lights. Close doors and windows. Point valve opening away from face and eyes when releasing. Use one unit for each 6,000 cubic feet of unobstructed area. Use additional units for remote rooms or where free flow of mist is not assured. Do not remain in the areas during treatment and ventilate thoroughly before re-entry.

To Operate Valve: To lock valve in open position for automatic discharge, press valve button all the way down, hooking the catch. Then place can on stand or table in center of the room with valve locked open, placing several layers of newspaper or pad under can. Leave building at once and keep building closed for two (2) hours before airing out. Open all doors and windows and allow to air for 30 minutes.

To kill Fleas and ticks: Destroy pets old bedding and replace. Use product as described. Treat dogs and cats with registered tick control product prior to re-entry.
